

A Comparison of Xeppo Group Insights Versions

How the newest version of XGI improves the Revenue Insights, Business Insights, and Data Check reports.

Introduction

Xeppo Group Insights has undergone a visual transformation, making it easier to find the data you need.

Previously, the Insights Report within Xeppo Group Insights contained links to all reports on one page. The large number of reports could be overwhelming, and feedback suggested that finding the correct report was challenging.

To combat this, we have redesigned the Insights report home page to be three separate pages, based on the reports contained within. This new design mimics Xeppo Insights Premium, our reporting suite for Practices. Each report has a clear purpose, so you know what data you will be viewing, and there is a direct link to [support documentation](#), so new users can easily learn how to use these reports. The reports themselves have also received a visual update, however, the data remains the same.

A bigger Practice name filter, so it is easier to select the Practice's data you wish to view.

Reports are listed in the side menu, rather than all being on one page.

Additional reports are available at the bottom of the page.

A clear purpose for each report, so you know what to expect.

A direct link to a Support Centre article with introduction videos and data explanation information.

More Reports :
All Revenue

Revenue Insights

- 01 Business & Adviser Insights**
Purpose: Analyse Revenue Types across all practices and drill down to the Practice and/or Client Adviser
- 02 Revenue by Segment**
Purpose: Analyse Revenue by Client Segments
